RaaS Sales Pitch — Revenue-as-a-Service

> **Transform your agency from hourly billing to outcome-based revenue.** *Track every dollar. Measure every outcome. Prove ROI in real-time.*

The Problem: Hourly Billing is Broken

Clients Hate	Agencies Hate
Unpredictable costs	Revenue capped by hours
Paying for inefficiency	Penalized for speed
Scope negotiations	Feast-or-famine cash flow

Result: Adversarial relationship. Everyone loses.

The Solution: RaaS (Revenue-as-a-Service)

Old Model (Hourly)	New Model (RaaS)
Bill for hours	Bill for outcomes
Client manages tasks	AI agents execute
Revenue = hours × rate	Revenue = missions × tier
Scale = hire more	Scale = deploy more agents

Bottom Line: Clients get predictability. Agencies get scalability. Everyone wins.

---

3 Tiers — Built for Every Stage

🟢 Starter — $49/mo

For: Solo founders, indie hackers, small automation needs

Credits	200/month
Projects	3 max
Commands	`/cook`, `/fix`, `/plan`, `/test`, `/review`
LLM	Local (Ollama)
Support	Email, 48hr
ROI	Automate 10-15 hrs/month

Best For: - Weekly report automation - Basic code scaffolding - Documentation generation - Simple data pipelines

---

🟡 Pro — $149/mo ⭐ MOST POPULAR

For: Growing agencies, startups, product teams

Credits	1,000/month (5x Starter)
Projects	10 max
Commands	All basic + `/deploy`, `/audit`, `/security`, `/kanban`
LLM	Premium (Claude 4.6, Gemini 1.5 Pro)
Support	Priority, 12hr
ROI Dashboard	✅ Live tracking
API Access	✅ Programmatic missions
ROI	Automate 50-75 hrs/month

Best For: - Full sprint automation - CI/CD pipeline management - Multi-repo refactoring - Agent team orchestration - Automated code reviews

---

🔴 Enterprise — $499/mo

For: Scale-ups, enterprises, high-volume operations

Credits	Unlimited
Projects	Unlimited
Commands	All Pro + custom
LLM	Any provider + custom fine-tuning
Support	Dedicated engineer, 4hr SLA
Uptime SLA	99.9% guarantee
Custom Agents	Trained on your codebase
Private Vault	Data never leaves boundary
Compliance	HIPAA, SOC2, custom gates
ROI	Automate 200+ hrs/month

Best For: - Enterprise-wide automation - Regulated industry compliance - Multi-team coordination - 24/7 autonomous operations

---

ROI Tracking — The Heart of RaaS

Stop Guessing. Start Measuring.

Every mission tracked. Every credit accounted for. Every dollar of value proven.

Real-Time Dashboard

```
┌──────────────────────────────────────────────────────┐
│  RaaS ROI Dashboard — This Month                     │
```

```
│  Missions Completed:     147                                  │
│  Credits Used:           847 / 1,000 (84.7%)                  │
│  Est. Hours Saved:       62 hrs  →  $9,300 value*             │
│  Tech Debt Fixed:        23 items                             │
│  Production Deploys:     8                                    │
│  Success Rate:           98.6%                                │
│  Avg. Completion Time:   4m 32s                               │
└──────────────────────────────────────────────────────────────┘
*Based on $150/hr agency rate
```

ROI Calculator (Built-In)

```
Your Monthly ROI = (Hours Saved × Agency Rate) - RaaS Subscription

Pro Tier Example:
= (62 hrs × $150/hr) - $149
= $9,300 - $149
= $9,151 net value/month
= 62x ROI
```

What Gets Measured

Metric	What It Shows	Why It Matters
Credits → Outcomes	Cost per mission	Prove every dollar generates value
Hours Saved	Manual work automated	Translate to billing equivalents
Success Rate	% missions without errors	Reliability = trust
Tech Debt Eliminated	TODOs, `any` types removed	Code quality = velocity
Cycle Time	Goal → deployed time	Speed = competitive advantage

Client Reporting Mode (Pro+)

White-label reports your clients can understand:

```
# Monthly Value Report — [Client Name]

## Outcomes Delivered
- ✅ 47 missions completed
- ✅ 3 production deployments
- ✅ 12 bugs auto-fixed
- ✅ 8 features shipped

## Investment
- Credits consumed: 423 MCU
- Equivalent hours: 28 hrs
- Your cost: $149 (Pro tier)
- Traditional agency cost: $4,200
- **You saved: $4,051**
```

API Access for Custom Analytics

```
# Pull your ROI data programmatically
curl https://api.agencyos.network/v1/roi \
  -H "Authorization: Bearer mk_abc123"
```

```
# Response:
{
  "period": "2026-03",
  "credits_spent": 847,
  "missions_completed": 147,
  "hours_equivalent": 62,
  "value_generated_usd": 9300
}
```

Credit System Explained

What is 1 Credit?

1 Credit = 1 MCU (Mission Control Unit)

Complexity	Credits	Character Length	Example
Simple	1	< 50 chars	"Fix typo in README"
Standard	3	50-149 chars	"Add user authentication"
Complex	5	≥ 150 chars	"Migrate database schema"
Multi-Agent	10+	Parallel orchestration	"Full sprint automation"

Auto-Detection: Complexity detected from mission length.

Unused Credits: - Starter: No rollover - Pro: Rollover enabled - Enterprise: Unlimited (no tracking)

Quality Gates — Binh Phap Standards

Every mission MUST pass before delivery:

Gate	Target	Verification
Tech Debt	0 TODO/FIXME	`grep -r "TODO|FIXME" src`
Type Safety	0 any types	`grep -r ": any" src`
Clean Code	0 console.log	`grep -r "console\." src`
Tests	100% pass	`npm test`
Performance	Build < 10s	`time npm run build`

We don't ship tech debt. Period.

Competitive Comparison

Feature	RaaS	Traditional Agency	Zapier
Pricing	Fixed/mo	$150-300/hr	$50/mo
Code Writing	✅ Yes	✅ Yes	❌ No
Testing	✅ 100%	⚠️ Varies	❌ N/A
Deployment	✅ Auto	⚠️ Manual	❌ No
Tech Debt	✅ 0	⚠️ Maybe	❌ N/A
24/7 Ops	✅ Yes	❌ No	❌ No
ROI Tracking	✅ Live	❌ Manual	❌ No

True Cost Comparison

Scenario: Automate weekly reporting + bug fixes + deployments

Platform	Monthly Cost	Annual
Zapier + Developer (20 hrs)	$3,050	$36,600
RaaS Pro	**$149**	**$1,788**
You Save	**$2,901/mo**	**$34,812/yr**

Getting Started — 3 Steps

1. Book a Demo

See live mission execution. Watch AI agents write, test, deploy in real-time. 👉 `agencyos.network/demo`

2. 14-Day Free Trial (Pro Tier)

Full access. 1,000 credits. No credit card required. 👉 `agencyos.network/pricing`

3. Custom Quote (Enterprise)

Deployment assessment + custom agent training. 👉 `sales@agencyos.network`

FAQ

Q: What happens if I run out of credits? A: Starter/Pro can purchase top-ups at $0.25/credit. Enterprise is unlimited.

Q: Can I pause my subscription? A: Yes, pause anytime. Projects accessible, missions queued until resume.

Q: What if a mission fails? A: Credits automatically refunded. Audit log shows failure reason.

Q: Can I self-host? A: Enterprise tier includes on-premise deployment with dedicated engineer.

Q: Is my code safe? A: Yes. Enterprise includes private knowledge vault — data never leaves your boundary.

Q: What LLMs do you support? A: All major providers via Antigravity Proxy: Claude 4.6, Gemini 1.5 Pro, Qwen 3.5+.
